

TOSTEM

The perfect finishing touch

STYLE LINE

TOTAL HOUSING SOLUTION

TOSTEM engages in product design, development, manufacturing and marketing of a diverse range of home products, such as window sashes, entrance doors, and exterior products. Our product portfolio allows us to provide complete "Lifestyle Solutions" that are flexible, integrated, and coordinated to consumer needs, delivering everyday satisfaction.

TOSTEM STYLE LINE

Experience the superior craftsmanship of TOSTEM STYLE LINE aluminum battens. Lightweight, dimensionally accurate, and maintenance-free, offering a high-quality alternative to PVC, steel and wood.

The TOSTEM Style Line provides designers with a variety of decorative screening and batten cladding applications and is constructed to withstand any outdoor or indoor elements, allowing them to achieve a vast multitude of looks and styles. TOSTEM complete looks are achieved with lightweight, sustainable, and long-lasting aluminum cladding that features exquisite Japanese innovation and quality. This will impart an uplifting appearance to your home.

1

Long Lasting

Avoid continuous cleaning and enjoy long-lasting durability with TOSTEM Style Line, which enhanced by its incredible innovation of scratch, dust, and dirt resistance.

2

Variety of Profile

Experience the endless possibilities with our extensive range of colors and unique profiles, allowing you to create the ideal appearance and achieve remarkable visual quality.

3

TOSTEM Total Look

Creating a cohesive appearance has never been easier with TOSTEM's wide range of products, which are available in consistent color profiles and are built with technology that allows for seamless integration.

4

Complete System

Offering a complete package of bars, end -caps and other installation material all from TOSTEM

TEXGUARD technology

TOSTEM products are equipped with a special protective coating that enhances their durability and long-lasting shine.

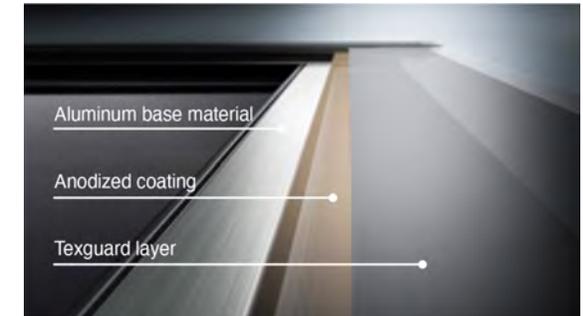

The colors of TOSTEM products remain vibrant for a minimum of 20 years thanks to the unique TEXGUARD system.

TEXGUARD is an extra layer of transparent synthetic resin paint applied over the anodized surface. This layer modifies the molecular structure of the surface paint and provides protection against light, heat, and water. This demonstrates the superior ability of 4H to resist scratches, as well as its ability to prevent the build-up of natural dust.

This one-of-a-kind TEXGUARD anodized finish not only provides exceptional protection but also exhibits the aesthetic appeal of untreated aluminum.

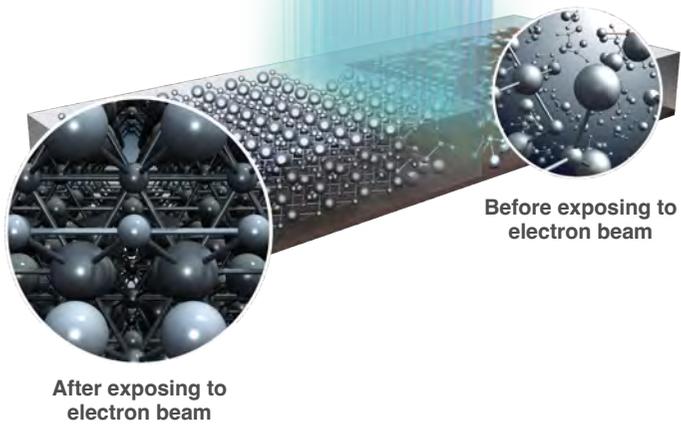

BENEFIT OF TEXGUARD

- **Color retention** - TEXGUARD protect the aluminum against harsh environmental conditions, making the color gloss stay for at least 20 years.
- **Increased hardness** - Dense coating of TEXGUARD improves hardness and provides scratch resistance for the aluminum surface.
- **Ease of cleaning** - Dust and dirt accumulation resistance quality of TEXGUARD makes the task of cleaning the surface less effort.

EB layers:

Electron Beam (EB) coating technology instantly improve the durability of resins and coating films by exposing them to electron beams. EB coated materials are highly scratch-resistant, abrasion-resistant, and soil-resistant compared to non-coated materials.

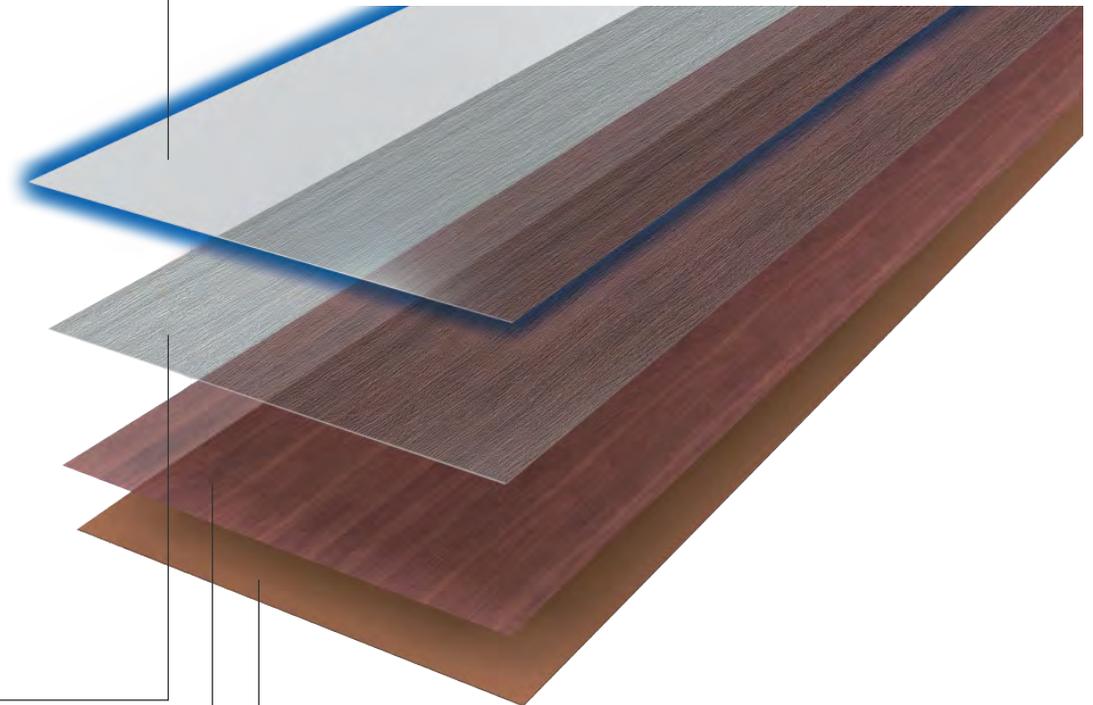

Before exposing to electron beam

After exposing to electron beam

EB coating technology

TOSTEM STYLE LINE with its unique wood grain pattern is enhanced by the addition of an EB coating, which not only adds a touch of elegance but also ensures exceptional durability over time.
